MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Rutu Maheshbhai Vekariya
B.Tech. Computer Engineering '27
Date of Birth: 1 June 2004

Education

MPSTME, NMIMS Deemed to be University **2023 – Present**
Bachelor of Technology in Computer Engineering
CGPA: 3.58/4.0
Relevant Coursework: Data Structures & Algorithms, DBMS, Cyber Security, Cryptography and Network Security

Khyati World School Ahmedabad **2022 – 2023**
Central Board Secondary Education: 72.20%

P.P. Savani School Ankleshwar **2020 – 2021**
Central Board Secondary Education: 92.83%

Experience

GlydeNight Startup | Technical Project Coordinator **July 2026 – October 2026**

- Served as the key communication link between the founder and the development team of an early-stage startup, translating ambiguous business requirements into clear problem statements, workflows, and actionable deliverables with documented processes and procedures.
- Coordinated cross-functional communication, documentation, and delivery timelines; tracked project risks and priorities to keep business and technology stakeholders aligned on measurable outcomes.

Firms Marketing Company | Web Developer Intern **May 2026 – July 2026**

- Advised clients across distinct industry domains through data-driven, risk-aware analysis, communicating insights and recommendations to guide business strategy and support informed decisions.

Projects

FutureMap | AI-Assisted Career Guidance Platform | Python, SQL, LLMs, Prompt Engineering, Node.js, React.js

- Built AI agents and AI-assisted recommendation tools end to end using LLM prompt engineering, testing, and iterating to deliver reliable, contextual outputs for users.
- Designed and developed a full-stack platform using Agile/Scrum practices, building REST APIs and SQL data-handling logic with Node.js and Express and a React.js front end to help students make informed career decisions.

Customer Churn & Retention Analytics | Python, SQL, Pandas, NumPy, Scikit-learn, Tableau

- Built a Python (Pandas, NumPy) and SQL data pipeline for data cleaning, entity-level exploratory data analysis, and statistical analysis to uncover churn patterns and risk drivers across contract type, tenure, and payment behavior.
- Built and benchmarked Scikit-learn models to optimize churn-risk prediction accuracy; flagged high-risk segments and quantified revenue at risk, presenting Tableau analytics that guided stakeholder retention decisions.

Distributed Quiz System | WebSockets, Real-Time Systems

- Architected a real-time backend system with live data ingestion and publishing pipelines, centralized management, and administrator monitoring for performance tracking and uptime.
- Implemented instant delivery and real-time synchronization, identifying and resolving reliability issues to improve system responsiveness.
- Built tab-switch detection to flag suspicious behavior, strengthening platform integrity and automated monitoring.

Car Price Prediction Machine Learning Project | Python, Scikit-learn

- Built and validated a regression-based machine learning model to forecast car prices from mileage, horsepower, and other vehicle attributes, applying statistical analysis to identify key valuation drivers.
- Evaluated model performance using regression metrics and validation to ensure reliable, accurate price forecasts.

Virtual Painter | Java, OpenCV

- Developed a gesture-based virtual drawing application in Java using object-oriented programming (OOP) and OpenCV real-time hand tracking, enabling brush control, color selection, and drawing through intuitive finger gestures.

Certifications & Publications

Coursera | Managing Projects with AI

Deloitte Data Analytics | Job Simulation Certification
Applied data analytics frameworks, data interpretation, and problem-solving methodologies, improving process efficiency by 25%.

AWS Academy Graduate | Cloud Architecting – Training Badge

Core Skills

Soft Skills
Communication, Leadership, Problem Solving, Ownership, Fast-Paced Execution, Teamwork, Time Management, Attention to Detail

Technical Skills

Programming & Scripting: Python, Shell Scripting, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Java, C++, JavaScript, Git, GitHub | **AI & NLP:** LLMs, GenAI Tools, RAG-Based Applications, AI Agents, NLP, Entity Recognition, Prompt Engineering, AI-Assisted Recommendation Systems | **Data & Automation:** SQL, Pandas, NumPy, Data Pipelines, Data Handling, Process Automation, Workflow Automation, Internal Tooling, Exploratory Data Analysis, Statistical Analysis, Data Cleaning | **Machine Learning:** Scikit-learn, Regression, Classification, Model Benchmarking, Model Evaluation | **Databases & Systems:** MongoDB, MySQL, PostgreSQL, Firebase, DBMS, System Monitoring, AWS (Cloud Architecting) | **Product & Collaboration:** Agile/Scrum, Customer Onboarding, Stakeholder Communication, Project Documentation, Delivery Coordination

Achievements and Positions of Responsibility

- Tech Lead for the Department of Creative and Content Creation at Ambiora (College Tech-Fest).
- Member of Computer Society of India (CSI) and a CSI Accredited Student (2024).
- Participated in Innvothon 24-hour Hackathon at NMIMS Indore (April 2026).
- Participated in Yugantar 24-hour Hackathon at NMIMS Shirpur (September 2025).
- Core Member of Atrangi Arts Club, NMIMS Shirpur (2025); Organizing Committee Member (2023–2025).
